

## Statement of shared effort on group project

Title of Project: Magnus Effect Airfoil

Group reports will be given a grade based on the report content and quality. Individual grades will be assigned according to the following formula:

Individual grade = Report grade X number of group members X percent contribution.

### Expectations:

- All group members are expected to write part of the reports.
- All group members are expected to provide substantive/constructive edits to their partner's first drafts.
- All group members are responsible to ensure that the report contains all of the deliverables.
- All group members to participate in a timely manner. This requires planning for enough time to respond to editing suggestions and final inspection of the report prior to submission.

Names of Group Members (Signed/Printed)	Percent Contribution
Simon Popecki 	34%
James Skinner 	33%
Jesse Feng 	33%
